

(3) The final planting date for spring-planted barley in all counties for which the Actuarial Table designates final planting dates for both spring-planted and fall-planted barley.

(i) *Prevented planting*—inability to plant barley with proper equipment by:

(1) The latest barley final planting date in the county; or

(2) The end of the late planting period.

You must have been unable to plant barley due to an insured cause of loss which is general in the area (i.e., most producers in the surrounding area are unable to plant due to similar insurable causes) and which occurs between the sales closing date and the latest barley final planting date in the county or within the late planting period.

(j) *Production guarantee*—the number of bushels determined by multiplying the approved yield per acre by the coverage level percentage you elect.

(k) *Timely planted*—barley planted by the final planting date, as established by the Actuarial Table, for barley in the county to be planted for harvest in the crop year.

[52 FR 28447, July 30, 1985, as amended at 54 FR 20504, May 12, 1989; 58 FR 33508, June 18, 1993; 58 FR 67633, Dec. 22, 1993; 60 FR 56934, Nov. 13, 1995]

§ 401.104 Winter coverage option for barley.

The Winter Coverage Option for Barley is not available in any counties for the 1988 crop year.

The provisions of the Winter Coverage Option for Barley for the 1988 through 1994 crop years are as follows:

FEDERAL CROP INSURANCE CORPORATION

Barley Endorsement—Winter Coverage Option

(This is a continuous Option)

Insured's Name _____
Address _____
Contract No. _____
Crop Year _____
Identification No. _____
SSN _____
Tax _____

In consideration of the additional premium as set by the Actuarial Table (FCI-35), the insurance provided is attached to and made part of the Barley Endorsement subject to the following terms and conditions:

1. You must have a barley endorsement.
2. Coverage under this option for fall-planted barley will begin at the time of planting and will end on the spring final planting date for barley in the county.
3. When there is not an adequate stand on the spring final planting date to produce the farm unit production guarantee, you have the option to:

a. Continue to provide sufficient care for the insured barley crop through harvest;

b. Replant all destroyed acreage to a spring variety of barley and receive a replanting payment in accordance with subsection 9.h. of the general crop insurance policy, and subsection 6.b. of the Barley Endorsement; or

c. Accept our appraisal of the production to count, destroy the remaining crop on the acreage and be paid any indemnity due under the terms of the general crop insurance policy and the barley endorsement.

4. In case of damage to the barley under this option, you must provide us with written notice prior to the spring final planting date for barley.

Insured's Signature _____
Date _____

Agent's Signature _____
Date _____

[52 FR 28447, July 30, 1987, as amended at 60 FR 56934, Nov. 13, 1995]

§ 401.105 Oat endorsement.

The provisions of the Oat Crop Insurance Endorsement for the 1988 through 1994 crop years are as follows:

FEDERAL CROP INSURANCE CORPORATION

Oat Endorsement

1. Insured Crop

a. The crop insured will be oats planted for harvest as grain and grain mixtures in which oats are the predominant grain.

b. In addition to the oats not insurable in section 2 of the general crop insurance policy, we do not insure any oats:

(1) If the seed has not been mechanically incorporated into the soil;

(2) If the seed is planted where an established grass or legume exists unless we agree, in writing, to insure such oats; or

(3) Destroyed or put to another use in order to comply with other U.S. Department of Agriculture programs.

2. Causes of Loss

The insurance provided is against unavoidable loss of production resulting from the following causes occurring within the insurance period:

- a. Adverse weather conditions;
- b. Fire;
- c. Insects;
- d. Plant disease;
- e. Wildlife;
- f. Earthquake;
- g. Volcanic eruption; or
- h. If applicable, failure of the irrigation water supply due to an unavoidable cause occurring after the beginning of planting;

§ 401.105

unless those causes are excepted, excluded, or limited by the actuarial table or section 9 of the general policy.

3. Annual Premium

a. The annual premium amount is computed by multiplying the production guarantee times the price election, times the premium rate, times the insured acreage, times your share at the time of planting.

b. If you are eligible for a premium reduction in excess of 5 percent based on your insuring experience through the 1984 crop year under the terms of the experience table contained in the oat policy for the 1985 crop year, you will continue to receive the benefit of the reduction subject to the following conditions:

- (1) No premium reduction will be retained after the 1991 crop year;
- (2) The premium reduction will not increase because of favorable experience;
- (3) The premium reduction will decrease because of unfavorable experience in accordance with the terms of the policy in effect for the 1985 crop year;
- (4) Once the loss ratio exceeds .80, no further premium reduction will apply; and
- (5) Participation must be continuous.

4. Insurance Period

In lieu of the provisions in section 7 of the general crop insurance policy, the following will apply:

a. Insurance attaches on each unit or part of a unit when the oats are planted except that, in counties with an April 15 cancellation date, insurance on fall-planted oats attaches on April 16 following planting if it is determined that there is an adequate stand on April 16 to produce a normal crop.

b. Insurance ends on each unit at the earliest of:

- (1) Total destruction of the oats;
- (2) Combining, threshing, harvesting for silage or hay, or removal from the field;
- (3) Final adjustment of a loss; or
- (4) The following dates of the calendar year in which oats are normally harvested:
 - (a) Alaska, September 25;
 - (b) All other states, October 31.

5. Unit Division

Oat acreage that would otherwise be one unit, as defined in section 17 of the general crop insurance policy, may be divided into more than one unit if you agree to pay additional premium as provided for by the actuarial table and if for each proposed unit:

- a. You maintain written, verifiable records of planted acreage and harvested production for a least the previous crop year and production reports based on those records are filed to obtain an insurance guarantee; and
- b. Acreage planted to insured oats is located in separate, legally identifiable sec-

7 CFR Ch. IV (1-1-98 Edition)

tions (except in Florida) or, in the absence of section descriptions (and in all of Florida) the land is identified by separate ASCS Farm Serial Numbers, provided:

(1) The boundaries of the sections or ASCS Farm Serial Numbers are clearly identified and the insured acreage is easily determined; and

(2) The oats are planted in such a manner that the planting pattern does not continue into the adjacent section or ASCS Farm Serial Number; or

c. The acreage planted to the insured oats is located in a single section or ASCS Farm Serial Number and consists of acreage on which both an irrigated and a nonirrigated practice are carried out, provided:

(1) Oats planted on irrigated acreage do not continue into nonirrigated acreage in the same rows or planting pattern; and

(2) Planting, fertilizing and harvesting are carried out in accordance with recognized good dryland and irrigated farming practices for the area.

If you have a loss on any unit, production records for all harvested units must be provided. Production that is commingled between optional units will cause those units to be combined.

6. Notice of Damage or Loss

In addition to the notices required in section 8 of the general crop insurance policy, in case of damage or probable loss you must give us written notice if you want to harvest the oats for silage or hay. After such notice is given, we will appraise the potential grain production. If we are unable to do so before harvest, you may harvest the crop provided representative samples are left for appraisal purposes. For purposes of this section and Section 8 of the general crop insurance policy the representative sample of the unharvested crop must be at least 10 feet wide and the entire length of the field.

7. Claim for Indemnity

a. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Subtracting therefrom the total production of oats to be counted (see subsection 7.b);

(3) Multiplying the remainder by the price election; and

(4) Multiplying this result by your share.

b. The total production (bushels) to be counted for a unit will include all harvested and appraised production.

(1) Mature oat production which otherwise is not eligible for quality adjustment will be reduced .12 percent for each .1 percentage point of moisture in excess of 14.0 percent; or

(2) Mature oat production which, due to insurable causes, has a test weight of less than

27 pounds per bushel or, as determined by a grain grader licensed by the Federal Grain Inspection Service or licensed under the United States Warehouse Act, contains less than 80 percent sound oats or is smutty, garlicky, or ergoty, will be adjusted by:

(a) Dividing the value per bushel of the insured oats by the price per bushel of U.S. No. 2 oats which do not grade smutty, garlicky, or ergoty; and

(b) Multiplying the result by the number of bushels of such oats. The applicable price for No. 2 oats will be the local market price on the earlier of the day the loss is adjusted or the day the insured oats are sold.

(3) Any harvested production from other volunteer plants growing in the oats will be counted as oats on a weight basis.

(4) Appraised production to be counted will include:

(a) Potential production lost due to uninsured causes and failure to follow recognized good oat farming practices;

(b) Not less than the guarantee for any acreage which is abandoned or put to another use without our prior written consent or damaged solely by an uninsured cause; and

(c) Any unharvested production.

(5) Any appraisal we have made on insured acreage for which we have given written consent to be put to another use will be considered production unless such acreage is:

(a) Not put to another use before harvest of oats becomes general in the county and is reappraised by us;

(b) Further damaged by an insured cause before the acreage is put to another use and is reappraised by us; or

(c) Harvested.

8. Cancellation and Termination Dates

The cancellation and termination dates are:

State and county	Cancellation and termination date
Alabama; Arkansas; Florida; Georgia; Louisiana; Mississippi; New Mexico except Taos County; North Carolina; Oklahoma; South Carolina; Tennessee; Texas; and Patrick, Franklin, Pittsylvania, Campbell, Appomattox, Fluvanna, Buckingham, Louisa, Spotsylvania, Caroline, Essex, and Westmoreland Counties, Virginia and all counties east thereof.	Sept. 30.
Arizona; California except Del Norte, Humboldt, Lassen, Modoc, Plumas, Shasta, Siskiyou, and Trinity Counties.	Oct. 31.
All other California counties; Taos County, New Mexico; all other Virginia counties and all other states.	Apr. 15.

9. Contract Changes

The contract change date is December 31 preceding the cancellation date for counties

with an April 15 cancellation date and August 15 preceding the cancellation date for all other counties.

10. Late Planting and Prevented Planting

(a) In lieu of subparagraphs 2.e.(4) and 21.o of the General Crop Insurance Policy (§401.8), insurance will be provided for acreage planted to oats during the late planting period (see subparagraph (c)), and acreage you were prevented from planting (see subparagraph (d)). These coverages provide reduced production guarantees for such acreage. The reduced guarantees will be combined with the production guarantee for timely planted acreage for each unit. The premium amount for late planted acreage and eligible prevented planting acreage will be the same as that for timely planted acreage. For example, assume you insure one unit in which you have a 100 percent share. The unit consists of 150 acres, of which 50 acres were planted timely, 50 acres were planted 7 days after the final planting date (late planted), and 50 acres are unplanted and eligible for prevented planting coverage. To calculate the amount of any indemnity which may be due to you, the production guarantee for the unit will be computed as follows:

(1) For timely planted acreage, multiply the per acre production guarantee for timely planted acreage by the 50 acres planted timely;

(2) For late planted acreage, multiply the per acre production guarantee for timely planted acreage by ninety-three percent (0.93) and multiply the result by the 50 acres planted late; and

(3) For prevented planting acreage, multiply the per acre production guarantee for timely planted acreage by fifty percent (0.50) and multiply the result by the 50 acres eligible for prevented planting coverage.

The total of the three calculations will be the production guarantee for the unit. Your premium will be based on the result of multiplying the per acre production guarantee for timely planted acreage by the 150 acres in the unit.

(b) You must provide written notice to us if you were prevented from planting (see subparagraph 11.(i)). This notice must be given not later than three (3) days after:

(1) The latest oat final planting date in the county if you have unplanted acreage that may be eligible for prevented planting coverage; and

(2) The date you stop planting within the late planting period on any unit that may have acreage eligible for prevented planting coverage.

(c) Late Planting.

(1) For all spring-planted oat acreage (and fall-planted oat acreage only where insurance is not offered for spring-planted oats) planted after the final planting date, but on or before 25 days after the final planting

date, the production guarantee for each acre will be reduced for each day planted after the final planting date by:

(i) One percent (.01) for the first through the tenth day; and

(ii) Two percent (.02) for the eleventh through the twenty-fifth day.

(2) In addition to the requirements of section 3 (Report of Acreage, Share, and Practice (Acreage Report)) of the General Crop Insurance Policy (§401.8), you must report the dates the acreage is planted within the late planting period.

(3) If planting of the oats continues after the final planting date, or you are prevented from planting oats during the late planting period, the acreage reporting date will be the later of:

(i) The acreage reporting date contained in the Actuarial Table; or

(ii) Five (5) days after the end of the late planting period.

(d) Prevent Planting (Including Planting After the Late Planting Period).

(1) If you were prevented from planting oats (see subparagraph 11(i)), you may elect:

(i) To plant oats during the late planting period. The production guarantee for such acreage will be determined in accordance with subparagraph 10.(c)(1);

(ii) Not to plant this acreage to any crop that is intended for harvest in the same crop year. The production guarantee for such acreage which is eligible for prevented planting coverage will be fifty percent (0.50) of the production guarantee for timely planted acres. In counties for which the Actuarial Table designates a spring final planting date, the prevented planting guarantee will be based on your approved yield for spring-planted oats. For example, if your production guarantee for timely planted acreage is 30 bushels per acre, your prevented planting production guarantee would be equivalent to 15 bushels per acre (30 bushels multiplied by 0.50). This section does not prohibit the preparation and care of the acreage for conservation practices, such as planting a cover crop, as long as such crop is not intended for harvest; or

(iii) To plant oats after the late planting period. The production guarantee for such acreage will be fifty percent (0.50) of the production guarantee for timely planted acres. For example, if your production guarantee for timely planted acreage is 30 bushels per acre, your prevented planting production guarantee would be equivalent to 15 bushels per acre (30 bushels multiplied by 0.50). Production to count for such acreage will be determined in accordance with subparagraph 7.b.

(2) In addition to the provisions of section 4 (Insurance Period) of this endorsement, the beginning of the insurance period for prevented planting coverage is the sales closing

date designated in the Actuarial Table for oats in the county.

(3) The acreage to which prevented planting coverage applies will be limited as follows:

(i) Eligible acreage will not exceed the greater of:

(A) The number of acres planted to oats on each ASCS Farm Serial Number during the previous crop year (adjusted for any reconstitution which may have occurred prior to the sales closing date);

(B) The ASCS based acreage for oats reduced by any acreage reduction applicable to the farm under any program administered by the United States Department of Agriculture; or

(C) One hundred percent (100%) of the simple average of the number of acres planted to oats during the crop years that were used to determine your yield;

unless we agree in writing, prior to the sales closing date, to approve acreage exceeding this limit.

(ii) Acreage intended to be planted under an irrigated practice will be limited to the number of oats acres properly prepared to carry out an irrigated practice.

(iii) A prevented planting production guarantee will not be provided for:

(A) Any acreage that does not constitute at least 20 acres or 20 percent (20%) of the acres in the unit whichever is less;

(B) Land for which the Actuarial Table does not designate a premium rate unless you submit a written request for coverage for such acreage prior to the sales closing date for oats in the county. Upon your timely written request, we will provide a written insurance offer for such acreage;

(C) Land used for conservation purposes or intended to be or considered to have been left unplanted under any program administered by the United States Department of Agriculture;

(D) Land on which any crop, other than oats, has been planted and is intended for harvest, or has been harvested in the same crop year; or

(E) Land which planting history or conservation plans indicate would remain fallow for crop rotation purposes.

(iv) For the purpose of determining eligible acreage for prevented planting coverage, acreage for all units will be combined and be reduced by the number of oat acres timely planted and late planted. For example, assume you have 100 acres eligible for prevented planting coverage in which you have a 100 percent (100%) share. The acreage is located in a single ASCS Farm Serial Number which you insure as two separate optional units consisting of 50 acres each. If you planted 60 acres of oats on one optional unit and 40 acres of oats on the second optional unit, your prevented planting eligible acreage would be reduced to zero (i.e., 100 acres

eligible for prevented planting coverage minus 100 acres planted equals zero). If you report more oat acreage under this contract than is eligible for prevented planting coverage, we will allocate the eligible acreage to insured units based on the number of prevented planting acres and share you reported for each unit.

(4) When the ASCS Farm Serial Number covers more than one unit, or a unit consists of more than one ASCS Farm Serial Number, the covered acres will be pro-rated based on the number of acres in each unit or ASCS Farm Serial Number that could have been planted to oats in the crop year.

(5) In accordance with the provisions of section 3 (Report of Acreage, Share, and Practice (Acreage Report)) of the General Crop Insurance Policy (§ 401.8), you must report any insurable acreage you were prevented from planting. This report must be submitted on or before the acreage reporting date for spring-planted oats in counties for which the Actuarial Table designates a spring final planting date, or the acreage reporting date for fall-planted oats in counties for which the Actuarial Table designates a fall final planting date only, even though you may elect to plant the acreage after the late planting period. Any acreage you report as eligible for prevented planting coverage which we determine is not eligible will be deleted from prevented planting coverage.

(6) If the amount of premium you are required to pay (gross premium less our subsidy) for the prevented planting acreage exceeds the prevented planting liability on a unit, prevented planting coverage will not be provided for that unit (no premium will be due and no indemnity will be paid for such acreage).

11. Meaning of Terms

(a) *Adequate stand*— a sufficient population of plants to produce at least the yield used to determine the guarantee.

(b) *Days*— calendar days.

(c) *Final planting date*— the date contained in the Actuarial Table by which the insured oats must initially be planted in order to be insured for the full production guarantee.

(d) *Harvest*—completion of combining, threshing, or cutting for hay or silage on any acreage.

(e) *Irrigated practice*— a method of producing a crop by which water is artificially applied during the growing season by appropriate systems, and at the proper times, with the intention of providing the quantity of water needed to produce at least the yield used to establish the irrigated production guarantee on the irrigated oat acreage.

(f) *Late planted*— acreage planted during the late planting period.

(g) *Late planting period*—(applicable only to spring-planted oat acreage and fall-planted oat acreage only where insurance is not of-

fered for spring-planted oats)—the period which begins the day after the final planting date for oats and ends twenty-five (25) days after the oat final planting date.

(h) *Latest oat final planting date*—

(1) The final planting date for spring-planted oats in all counties for which the Actuarial Table designates a final planting date for spring-planted oats only;

(2) The final planting date for fall-planted oats in all counties for which the Actuarial Table designates a final planting date for fall-planted oats only; or

(3) The final planting date for spring-planted oats in all counties for which the Actuarial Table designates final planting dates for both spring-planted and fall-planted oats.

(i) *Prevented planting*—inability to plant oats with proper equipment by:

(1) The latest oat final planting date in the county; or

(2) The end of the late planting period.

You must have been unable to plant oats due to an insured cause of loss which is general in the area (i.e., most producers in the surrounding area are unable to plant due to similar insurable causes) and which occurs between the sales closing date and the latest oat final planting date in the county or within the late planting period.

(j) *Production guarantee*— the number of bushels determined by multiplying the approved yield per acre by the coverage level percentage you elect.

(k) *Timely planted*—oats planted by the final planting date as established by the Actuarial Table, for oats in the county to be planted for harvest in the crop year.

[52 FR 28447, July 30, 1987, as amended at 54 FR 20504, May 12, 1989; 58 FR 33508, June 18, 1993; 58 FR 67634, Dec. 22, 1993; 60 FR 56934, Nov. 13, 1995]

§ 401.106 Rye endorsement.

The provisions of the Rye Crop Insurance Endorsement for the 1988 through 1994 crop years are as follows:

FEDERAL CROP INSURANCE CORPORATION

Rye Endorsement

1. Insured Crop

a. The crop insured will be rye planted for harvest as grain.

b. In addition to the rye not insurable in section 2 of the general crop insurance policy, we do not insure any rye:

(1) If the seed has not been mechanically incorporated into the soil;

(2) If the seed is planted where an established grass or legume exists unless we agree, in writing, to insure such rye; or

(3) Destroyed or put to another use in order to comply with other U.S. Department of Agriculture programs.
